

# Vector® F Series Multi-Cook Oven

Providing unmatched cooking results and value to the kitchen, Vector F Series models are specifically designed for high-volume cooking.

Featuring three or four independent oven chambers, operators can control the temperature, fan speed and cook time in each individual chamber for maximum flexibility – simultaneously cooking a variety of menu items with no flavor transfer.

Exclusive Structured Air Technology® delivers focused heat for faster, more even cooking and consistent, high-quality results.

Cook by time or optional temperature probes in single or combined chambers.

Reallocate skilled labor by eliminating extra steps in food production and the need to watch and rotate pans.

Replace or relieve multiple pieces of equipment in the kitchen.

Maximize space and reduce installation and operating costs with waterless design – no plumbing, drains, filtration or associated maintenance.

Stack with multiple pieces of equipment, including Combitherm® ovens, to minimize equipment footprint and optimize kitchen layout.

An advanced control – designed intentionally simple – features an intuitive, user-friendly interface and programmable recipes to ensure consistency with each cook.

ChefLinc™, cloud-based remote oven management software, streamlines processes and maximizes profits with data-driven insights (deluxe control only).
