

Item #: 20299

INDUCTION HEAT DIFFUSER / TRIVET – 11" DIA

For use with certain induction stoves that have trouble reading Bon Chef Induction chafers. The Bon Chef Steel Induction Trivet is 11" in diameter and should be placed on top of the induction stove surface below your Bon Chef Induction chafer.

Why the Trivet?

Certain induction stoves have trouble reading the stainless steel used in the construction of our Induction Chafers. Bon Chef uses a higher quality stainless steel that results in an induction ready chafer that has enhanced corrosion resistance. All Bon Chef Chafers work on Bon Chef Induction stoves.

For use with the following models:

- 20305
